

DON'T BE LEFT OUT ON THE TARMAC.

Time is Running Out.

ADS-B Out will be required to operate in controlled airspace globally on January 1, 2020. If your aircraft does not comply...you may not fly. As the deadline nears, solutions may become more expensive with high-demand components and limited shop space. Shop capacity and time to complete the mandate for all affected aircraft is already estimated to be insufficient. Pentastar Aviation will get you back in the air as quickly as possible. As a full service shop, we can also perform additional upgrades or maintenance services you may need to reduce downtime.

Don't wait any longer – schedule your installation today!

Our team has extensive experience providing MRO services on aircraft from all manufacturers, including:

- Bombardier
- Gulfstream
- Dassault
- Textron

All of our MRO services are Pentastar Certified® — so you can be assured that all work on your aircraft is being performed by expert technicians committed to adhering to the strictest safety standards and industry best practices.
